## YellowScan Honored by La Lettre M in the “International” Category

Montpellier, France – November 3, 2025 – YellowScan, a French leader in LiDAR mapping solutions for drones, has been awarded by La Lettre M at the Masters de l'Entreprise Occitanie Est 2025 ceremony in the International category.

This recognition highlights YellowScan's sustained growth and global presence, now active in over 60 countries through a robust network of UAV distributors and partners.

Since 2012, YellowScan has been dedicated to designing, manufacturing, and marketing airborne LiDAR systems for 3D mapping, serving diverse applications such as surveying, archaeology, civil engineering, forestry, and aquatic environment management.

Among its innovations, the **YellowScan Navigator**, a bathymetric LiDAR specifically designed for coastal and riverine mapping, stands out for its pivotal role in environmental protection and sustainable land management. By providing precise data on shoreline evolution, it enables public and private stakeholders to anticipate risks, plan restoration efforts, and safeguard fragile ecosystems.

Complemented by the **YellowScan CloudStation** software, which simplifies data processing and analysis, this solution reflects a commitment to responsible innovation, offering accessible tools for more sustainable natural resource management.

Headquartered near Montpellier, YellowScan continues to pursue its ambition: to become the global leader in drone-based LiDAR solutions by combining technological excellence, customer proximity, and sustainability.

Basée à proximité de Montpellier, YellowScan poursuit son ambition : devenir le leader mondial des solutions LiDAR pour drones, en conjuguant excellence technologique, proximité client et durabilité.
